

ANSI SQL Using MySQL Exercises(1-15)

1. User Upcoming Events

Show a list of all upcoming events a user is registered for in their city, sorted by date.

The screenshot shows a MySQL IDE window titled "Query 1" and "SQL File 2* x". The SQL query is as follows:

```
1 • SELECT u.full_name,u.city,r.event_id, e.title,e.city,e.start_date
2   from registrations r
3   join Events e on r.event_id = e.event_id
4   join users u on r.user_id = u.user_id
5   where e.status = 'upcoming'
6   and u.city = e.city
7   ORDER BY e.start_date
8
```

Below the query editor, the "Result Grid" is displayed, showing the results of the query. The grid has columns: full_name, city, event_id, title, city, and start_date. The results are as follows:

full_name	city	event_id	title	city	start_date
Alice Johnson	New York	1	Tech Innovators Meetup	New York	2025-06-10 10:00:00
Ethan Hunt	Los Angeles	3	Frontend Development Bootcamp	Los Angeles	2025-07-01 10:00:00

2. Top Rated Events

Identify events with the highest average rating, considering only those that have received at least 10 feedback submissions.

```

56 • SELECT
57     e.title,
58     AVG(f.rating) AS average_rating
59 FROM Feedback f
60 JOIN Events e
61     ON f.event_id = e.event_id
62 GROUP BY e.event_id, e.title
63 HAVING COUNT(*) >= 10
64 ORDER BY average_rating DESC
65 LIMIT 1;
66

```

title	average_rating
Tech Innovators Meetup	4.0769

3. Inactive Users

Retrieve users who have not registered for any events in the last 90 days.

```

• SELECT *
FROM Users u
WHERE u.user_id NOT IN (
    SELECT r.user_id
    FROM Registrations r
    WHERE r.registration_date >= CURDATE() - INTERVAL 90 DAY
);

```

user_id	full_name	email	city	registration_date
1	Alice Johnson	alice@example.com	New York	2024-12-01
2	Bob Smith	bob@example.com	Los Angeles	2024-12-05
3	Charlie Lee	charlie@example.com	Chicago	2024-12-10
4	Diana King	diana@example.com	New York	2025-01-15
5	Ethan Hunt	ethan@example.com	Los Angeles	2025-02-01

4.

Peak Session Hours

Count how many sessions are scheduled between 10 AM to 12 PM for each event.

```

101 • SELECT e.title, COUNT(s.session_id) AS count_of_session
102     FROM events e LEFT JOIN sessions s on e.event_id = s.event_id
103     WHERE TIME(s.start_time) BETWEEN '10:00:00' AND '12:00:00'
104     GROUP BY e.event_id;

```

Result Grid Filter Rows: Export: Wrap Cell Content:		
	title	count_of_session
▶	Tech Innovators Meetup	2
	Frontend Development Bootcamp	1

5. Most Active Cities

List the top 5 cities with the highest number of distinct user registrations.

```

117 -- 5. Most Active Cities
118 • SELECT u.city, COUNT(DISTINCT r.registration_id) AS registration_count
119     FROM users u JOIN registrations r on u.user_id = r.user_id
120     GROUP BY u.city ORDER BY registration_count DESC LIMIT 5;
121

```

Result Grid Filter Rows: Export: Wrap Cell Content:		
	city	registrations
▶	Los Angeles	2
	New York	2
	Chicago	1

6. Event Resource Summary

Generate a report showing the number of resources (PDFs, images, links) uploaded for each event

```

121
122 -- 6. Event Resource Summary
123 • SELECT e.title,COUNT(r.resource_id)
124 FROM events e JOIN resources r on r.event_id = e.event_id
125 GROUP BY e.event_id,e.title;
126

```

Result Grid		Filter Rows:	Export:	Wrap Cell Content:
	title	COUNT(r.resource_id)		
▶	Tech Innovators Meetup	1		
	AI & ML Conference	1		
	Frontend Development Bootcamp	1		

7. Low Feedback Alerts

List all users who gave feedback with a rating less than 3, along with their comments and associated event names

```

126
127 -- 7. Low Feedback Alerts -List all users who gave feedback with a rating less than 3, alo
128 • SELECT u.user_id,u.full_name,e.title,f.rating,f.comments
129 FROM users u JOIN Feedback f on u.user_id = f.user_id
130 JOIN events e on f.event_id = e.event_id
131 where f.rating <3;

```

Result Grid

Filter Rows:

Export:

Wrap Cell Content:

	user_id	full_name	title	rating	comments
▶	4	Diana King	Tech Innovators Meetup	2	Venue could improve

8. Sessions per Upcoming Event

Display all upcoming events with the count of sessions scheduled for them.

```

132
133     -- 8. Sessions per Upcoming Event
134 •   SELECT e.title,COUNT(s.session_id) AS total_sessions
135     FROM events e JOIN sessions s on e.event_id = s.event_id
136     WHERE e.status = 'upcoming'
137     GROUP BY e.event_id,e.title;
138
139

```

Result Grid	Filter Rows:	Export:	Wrap Cell Content:
	title	total_sessions	
▶	Tech Innovators Meetup	2	
	Frontend Development Bootcamp	1	

9. Organizer Event Summary

For each event organizer, show the number of events created and their current status (upcoming, completed, cancelled).

```

138
139     -- 9. Organizer Event Summary
140 •   SELECT u.full_name as 'organiser_name',COUNT(event_id), e.status
141     from events e join users u on u.user_id =e.organizer_id
142     GROUP BY organiser_name,status;
143

```

Result Grid	Filter Rows:	Export:	Wrap Cell Content:
	full_name	status	total_events
▶	Alice Johnson	upcoming	1
	Charlie Lee	completed	1
	Bob Smith	upcoming	1

10. Feedback Gap

Identify events that had registrations but received no feedback at all

```

144      -- 10. Feedback Gap
145 •   select e.event_id,e.title
146      FROM events e JOIN registrations r ON e.event_id = r.event_id
147      LEFT JOIN feedback f on f.event_id = e.event_id
148      where f.feedback_id IS NULL
149      GROUP BY e.event_id,e.title;
150
151

```

Result Grid	Filter Rows:	Export:	Wrap Cell Content:
event_id	title		
3	Frontend Development Bootcamp		

11. Daily New User Count

Find the number of users who registered each day in the last 7 days

```

155 •   SELECT registration_date,
156          COUNT(*) AS total_users
157      FROM Users
158      WHERE registration_date >= CURDATE() - INTERVAL 7 DAY
159      GROUP BY registration_date
160      ORDER BY registration_date;
161

```

Result Grid	Filter Rows:	Export:	Wrap Cell Content:
registration_date	total_users		

12. Event with Maximum Sessions

List the event(s) with the highest number of sessions.

```

165 • SELECT e.title,
166         COUNT(s.session_id) AS total_sessions
167 FROM Events e
168 JOIN Sessions s
169     ON e.event_id = s.event_id
170 GROUP BY e.event_id, e.title
171 HAVING COUNT(s.session_id) = (
172     SELECT MAX(session_count)
173     FROM (
174         SELECT COUNT(*) AS session_count
175         FROM Sessions
176         GROUP BY event_id

```

Result Grid

	title	total_sessions
▶	Tech Innovators Meetup	2

13. Average Rating per City

Calculate the average feedback rating of events conducted in each city

```

179 -- 13. Average Rating per City
180 • SELECT e.city, AVG(f.rating) as 'average_rating_per_city'
181 from events e join feedback f on f.event_id = e.event_id
182 GROUP BY e.city;
183
184

```

Result Grid

	city	average_rating_per_city
▶	New York	4.0769
	Chicago	4.5000

14. Most Registered Events

List top 3 events based on the total number of user registrations

```

184 -- 14. Most Registered Events
185 • SELECT e.title,
186       COUNT(r.registration_id) AS registrations
187 FROM Events e
188 JOIN Registrations r
189   ON e.event_id = r.event_id
190 GROUP BY e.event_id, e.title
191 ORDER BY registrations DESC
192 LIMIT 3;

```

Result Grid			Filter Rows:	Export:	Wrap Cell Content:	Fetch rows:
	title	registrations				
▶	Tech Innovators Meetup	2				
	AI & ML Conference	2				
	Frontend Development Bootcamp	1				

15. Event Session Time Conflict

Identify overlapping sessions within the same event (i.e., session start and end times that conflict)

```

-- 15. Event Session Time Conflict
SELECT s1.event_id,
       s1.session_id,
       s2.session_id
FROM Sessions s1
JOIN Sessions s2
  ON s1.event_id = s2.event_id
 AND s1.session_id < s2.session_id
 AND s1.start_time < s2.end_time
 AND s1.end_time > s2.start_time;

```
